Abstract (en)

[origin: WO2012101250A1] The invention relates to a bale press (1) for compacted pressed bales (6) of fibrous material (7), in particular textile fibres. The bale press (1) has a pressing device (8) with a compression box (12) and a filling device (9) with two parallel filling strands (10, 11), which serve for filling the compression box (12) with fibrous material (7). The multi-strand filling device (9) and the pressing device (8) operate on a cyclical basis, wherein the compression box (12) is filled with multiple charges of fibrous material that are compacted individually or together.
