Abstract (en)

[origin: DE102011009765B3] The weaving machine (1) has a shedding unit (4) for variable lifting and lowering the wrap material (3) for forming a weaving shed (5). The upper and lower limiting units (16) are provided, which limit the opening of the weaving shed. The limiting units are movable in wrap direction within a limiting unit movable area (BB) between an upstream end position (EP2) and a downstream end position (EP1). An independent claim is also included for a method for manufacturing a fabric.
