Abstract (en)

[origin: WO2012101041A1] The invention relates to a device (17) comprising an exhaust treatment device (1) for purifying the exhaust gases of an internal combustion engine (2). Said exhaust treatment device comprises at least one injector (3) for supplying a fluid to the exhaust gas treatment device (1) and is equipped with at least one fan (4) that permits ambient air to be actively delivered to the injector (3) on demand, in order to cool said injector (3).
