Abstract (en)

[origin: WO2012101379A1] The invention relates to a device for monitoring a pneumatically-actuated alternating linear displacement pump, and to a system for monitoring a pneumatically-actuated alternating linear displacement pump, which comprise a means for sensing pneumatic pressure, a means for transmitting a signal representative of the sensed pneumatic pressure, and a means for managing the pneumatically-actuated alternating linear displacement pump in accordance with the transmitted signal representative of the sensed pneumatic pressure.
