Abstract (en)
[origin: EP2668876A1] The furniture has a rack (40) acting as a spacer between side walls in a unfolded position of the furniture such that upper and lower floors (10, 20) are folded back, side by side against one another in a less obstruction position by a transverse folding line (7) of a bottom wall. Unfolding of the furniture is authorized by setting the floors in a volume of the furniture, automatically, and overlapping the floors by a rotation of the upper floor around the line until the setting abuts from a lower part of the upper floor to an upper part of the lower floor.
