Abstract (en)

[origin: EP2668884A2] The machine (1) has a program controlling device (3) controlling rinsing or washing processes. A control device (9) is provided with a delay start function or a smart start function that is selected by a pre-selected rinsing or washing program, where the rinsing or washing program is automatically started after preset time. The controlling device is connected to a monitoring device for signaling a user before activating delay start or a smart start function of the program by a display device (51) that is signaled when a building side water inlet valve (6) is closed.
