Abstract (en)
[origin: EP2669445A2] The component (1) has two wall panels (3,4). The different grain sizes with a curable mixture of components are filled in an intermediate space formed between the wall panels. The formwork elements (2,6) are arranged on the boundary surface of the semi-finished components engaged in the wall panels. The formwork elements are partially permeable to the constituents of the curable mixture.
