Abstract (en)

[origin: EP2669447A1] The window has a window frame (3) and a wing frame (1), which are provided in a component of a roof construction. A glass pane (2) i.e. insulation glass pane, is arranged in the wing frame. An operation drive is provided for an operation of the wing frame. The operation drive comprises a gas pressure spring (4) and a spindle motor (5). The gas pressure spring decreases up to 95% of opening force. The operation drive is rotatably fixed on the component of the roof construction. Brackets (6, 7) are arranged at the wing frame.
