Abstract (en)
[origin: EP2669610A2] The apparatus has a support rail made of a plastic material (308) and comprising a stiffening element (326) i.e. stiffener rail, made of a stiff material (306) i.e. plastic material. The support rail and the stiffening element are connected with each other by a weld connection. The stiffening element comprises an exposed portion and a covered portion. The support rail comprises an evaporation tray portion and a functional element e.g. clamp element and cord grip. The functional element fastens and/or positions a component i.e. compressor, of the cooling apparatus.
