Abstract (en)

A mobile communications terminal (200) comprising a memory (240), a display (120, 220) and a controller (210). The controller (210) is configured to display at least one smaller icon (510) for indicating a status and to receive a selection of a status menu option. The apparatus is further configured to display an enlarged icon (550) being an enlarged version of a corresponding smaller icon (510) for enabling a cognitive link between the smaller icon and a related status in response to receiving the selection.
