Abstract (en)
[origin: WO2012104385A1] A kit comprising a beverage cup (30), an infusible material used in the preparation of the beverage in a closed compartment within the cup (30) and a drink- through lid (1) for the beverage cup (30) the lid (1) having a filter to filter out the infusible material from the beverage. The drink- through lid (1) comprising a lid body (2) with a drink- through aperture (5) defined in the lid body through which a beverage (40) can exit the lid (1 (while drinking when the lid (1) is on the beverage cup (30). The drink- through aperture (5) comprises an area of the lid (1) in which there is defined at least 20 apertures, the apertures being large enough to allow a beverage to be drank through the lid whilst obstructing passage of a filtrate material (50).
