Abstract (en)
[origin: WO2012104329A1] The invention relates to a headphone, comprising at least one microphone (12), an analog pre-emphasis filter (20) for the pre-emphasis of the microphone signal, an analog-to-digital converter (30) for digitizing the output signal of the pre-emphasis filter, an active noise compensation unit (40) for carrying out active noise compensation on the basis of the output signal of the microphone (12) that has undergone pre-emphasis and digitization and for outputting a counter sound signal, and a digital-to-analog converter (50) for carrying out an analog/digital conversion of the counter sound produced by the active noise compensation unit (40).
