Abstract (en)

[origin: WO2012104169A2] The invention relates to an assembly for controlling an electric vacuum pump (1) for a vehicle, said assembly being connectable to a supply voltage (2) by means of at least one switch (4, 7, 10, 13) that can be controlled by an electronic control unit. In a start-up phase of the vacuum pump (1), the electronic control unit connects an additional electric resistor (6; 9, 12) between the supply voltage (2) and the vacuum pump (1).
