Abstract (en)
[origin: EP2672053A1] The arrangement (100) has two profiles comprising outer profiles (11, 13) and inner profiles (10, 12) connected with the outer profiles using insulation rods (50-53). The profiles are brought in a closed position, in which the profiles define a hollow space (70). An insertion unit (40) partially protrudes into the hollow space. The profiles are swiveled opposite to each other. The insertion unit comprises a wall area (41), which partially extends into the hollow space. The insertion unit is made of polyamide or PVC.
