Abstract (en)

[origin: EP2672172A1] The lamp (1) has a reflector (5) comprising a base wall (6) in a reflector cross sectional profile and two curved side walls (7) staying away from the base wall. A rectilinear diffuser (8) i.e. profiled rail, is arranged at a distance from the reflector. The side walls comprise a distal extremity (33) so that an outlet plane (27) of the reflector is defined by a connection-straight line (V) connecting the distal extremity. The diffuser is partly arranged in the reflector cross sectional profile on a side of the outlet plane opposite to a light (4).
