Abstract (en)

[origin: EP2672331A1] The part (20) has an exterior element (30) for securing the part on a securing area by an elastic securing unit (70). An aperture (26) opens onto the securing area at the elastic securing unit for enabling a user to act on and deform the elastic securing unit and to separate the exterior element from the part. The securing unit comprises a female part (72) and a male part (71), which includes two hooks, where one of the hooks is flexible and arranged on a face of the exterior element. The female part is arranged on the part.
