Abstract (en)  
[origin: EP2672337A1] The device has a removable attachment part (1) connected to a case (2) in a swiveling manner. The part includes a hinge (5) assembled onto the case. A rod (4) is inserted in the hinge, and ends of the rod are placed in pins (6) interdependent of the case. The pins are arranged in housings (32) of the case according to an axis perpendicular to that of a plane of the case. The pins include shoulders defining a bearing surface that co-operates with attaching parts i.e. screws (7) to the case.
