Abstract (en)

[origin: EP2672565A1] A glass antenna arranged at a window glass (23) includes a signal-side feeding portion (16) and a ground-side feeding portion (17) that are aligned in a vertical direction; an F-shaped element that is formed into an F-shape by a linear conductor (1) connected to the signal-side feeding portion (16) and extending in the horizontal direction and linear conductors (2, 3) extending in the vertical direction from the linear conductor (1) as an origin; and an L-shaped element formed into an L-shape by a linear conductor (4) connected to the ground-side feeding portion (17) and extending in the horizontal direction and a linear conductor (5) extending upward from the linear conductor (4) as an origin.
