Abstract (en)
[origin: WO2012074465A1] The invention relates to an operation device for marine vessels, comprising a housing (1), a propeller (2) peripherally journaled in a bearing (11), said bearing being fixedly arranged in said housing, and a driving device (4) for rotating said propeller (2). The operation device is characterized in that the bearing is water lubricated. The invention further relates to a marine vessel, comprising such an operation device.
