Abstract (en)
[origin: WO2012107683A1] A method for coating a sample using a coating material, characterised in that the coating material is obtained from a mixture of: a polysaccharide powder, serving as a gelling polymer; and a reinforcing powder in the form of a powder of a complex intermetallic alloy or a powder comprising a complex intermetallic alloy and at least one compound selected from a ceramic compound and a polymer compound, in which the volume fraction of the reinforcing powder does not exceed 60% of the total volume of the mixture.
