Abstract (en)

[origin: WO2012107097A1] The optical component is equipped with a lens structure. It has a substrate having two main surfaces. Both surfaces exhibit a similar lens structure but the lens structure of the second main surface is distorted as compared with the lens structure of the first main surface. It is possible to use a constant distortion factor which lies in the range of 1.001 to 1.05.
