Abstract (en)

[origin: CA2818246A1] The invention concerns a metering disk (1) of a capsule filling device for filling capsules with powder products as well as a capsule filling device with such a metering disk (1). The metering disk (1) has a plurality of metering openings (2). The metering disk (1) has moreover a disk base member (3) and at least one thickness adaptation sheet (4, 4', 4'') connectable detachably with the disk base member (3). The metering opening (2) penetrates the disk base member (3) and the at least one thickness adaptation sheet (4, 4', 4''). In a corresponding capsule filling device, the metering disk (1) and in particular a tamping ring (9) arranged below the metering disk (1) are mounted in a fixed vertical position.
