Abstract (en)
[origin: EP2674534A1] The fitting structure (1) has an extendible shower (2) that is attached to a shower hose (4). An end region (3) of housing (21) is provided adapted to receive the shower. A feed-through portion of housing is provided to allow for passage of the shower hose through the housing. Specific guide unit is provided to space the shower hose from an inner wall surface of the feed-through portion, and is provided in an end region of the housing. Other guide unit is provided to align the shower hose in a fully retracted state along circumferential direction.
