Abstract (en)
[origin: EP2674553A1] The cylinder lock has main portion (1) that is provided with close channel (3) whose specific side is provided with knob (2), while other side is provided with key insertion hole. The knob is connected to knob axle (4) via knob-side core portion (5), and the close channel is provided with channel-side core portion (6). The core portions are coupled to close beard adapter (7) having locking portion (8). The knob is rotated to different positions so that the close beard adapter having locking portion is rotated so as to lock or unlock the cylinder.
