Abstract (en)
[origin: EP2674582A1] The camshaft adjustment device (10) has a shaft-in-shaft system (16) comprising two shafts (12,14) that are arranged coaxial to each other. A connection area (38) is arranged on the former shaft in a torque-proof manner, and another connection area (42) is arranged on a stator (44) in a torque-proof manner. An axially extending attachment (20) is arranged such that the two connection areas are coupled with each other. The two connection areas and the attachment are formed as an axial plug-in connection.
