Abstract (en)
[origin: EP2674707A2] The mounting part has a wall plate having a free edge and a decorative profile (4) put on the free edge. The wall plate is limited by an undercut edge opposite to the free edge. The decorative profile has a main plate (8) covering the wall plate and a latching contour engaging the undercut edge into an undercut (12). The free edge is received in a groove (14) of the decorative profile. The groove opens towards the latching contour. The decorative profile is partially formed of metal, particularly aluminum, and has a coextruded layer of metal and of polymer.
