Abstract (en)
[origin: WO2012093234A2] The present invention relates to polysaccharides selected from sulphated arabinogalactans, apiogalacturonans and sulphated heteroglycans intended to be used as a drug for the preventive or curative treatment of an influenza virus, as well as to the pharmaceutical composition including, in particular in combination with at least one pharmaceutically acceptable carrier: either an extract of *Codium fragile*, including sulphated arabinogalactans; an extract of *Zostera marina* or *Lemna minor*, including apiogalacturonans; or an extract of *Caulerpa racemosa*, including sulphated heteroglycans.
