Abstract (en)
[origin: WO2013121046A1] The invention relates to a storage container (10), in particular a final disposal container for contaminated materials. In order to make it possible to produce the storage container especially advantageously and substantially without the occurrence of dross, the storage container (10) comprises a container body (12) that has a container bottom (26) and at least one container side wall (28, 30, 32, 34), wherein the container body (12) has a filling opening (16) that can be closed by a container cover (14), wherein the container body (12), at the end of at least one container side wall (28, 30, 32, 34) opposite the container bottom (26), has a projection (36) that has a wedge-shaped cross-section and is formed on the inside of the container, and wherein the wedge-shaped projection (36) thickens due to a slanted portion (38) that extends at an angle in a range of $\geq 10^\circ$ to $\leq 35^\circ$ relative to the orientation of the container side wall (28, 30, 32, 34). The invention further relates to a method for producing a storage container (10), in particular a final disposal container for contaminated materials.
