Abstract (en)

[origin: WO2012110630A1] The invention relates to a device (10) for handling notes of value, comprising two intermediate storage units (32, 500) for the intermediate storage of notes of value and a stack merging unit (802). The stack merging unit (802) merges a first stack, which is formed of notes of value stored on an intermediate basis in the first intermediate storage unit (32), and a second stack, which is formed of notes of value stored on an intermediate basis in the second intermediate storage unit (500), to form a single merged stack.
