Abstract (en)

[origin: WO2012110746A1] The invention relates to a method for producing a material including a substrate, at least one of the surfaces of which is coated with a titanium-oxide photocatalytic layer, said method including depositing said photocatalytic layer by a chemical vapour deposition method in which a gaseous mixture, including at least one titanium alkoxide and at least one compound including at least one carboxyl or ester group, is placed in contact with said substrate.
