Abstract (en)

[origin: WO2012110378A1] A stator element for a high-vacuum pump is arranged downstream of the last rotor element in the pumping direction (26). The stator element has a housing element (28), which is connected to a housing (12) of the high-vacuum pump. A plurality of stator webs (32), which are distributed regularly in the circumferential direction, are arranged on an inner surface (30) of the housing element (28).
