Abstract (en)
[origin: WO2012110296A2] The invention relates to a domestic appliance having a cover cap (19) for covering a recess (25) formed in a component (13), said recess being delimited by lateral walls (29) and a bottom (31) which is set back from the component surface (27) by a countersinking depth (s). The recess (25) is in particular a recess for a screw head, into which a screw head (23) of a fastening screw (18) is recessed and with which the component (13) is in a screwed connection with a base part (1). According to the invention, the cover cap is in a latching connection with the component (13), in which at least one undercut (34) is formed in the lateral wall (29) of the recess (25) and wherein a latching element (33) of the cover cap (19) engages behind the undercut.
