Abstract (en)
[origin: WO2012110556A1] The invention relates to a device (10) for handling valuable documents, comprising a transport unit (24, 26) for transporting the valuable documents in a transport direction (P2) along a transport path (602) and an aligning unit (600) for aligning the valuable documents. Furthermore, the device (10) has a sensor (300) arranged upstream of the aligning unit (600) for determining at least one feature of the valuable documents and a control unit (28), which controls the aligning unit (600) in such a way that the aligning unit (600) aligns a valuable document in a preset first target alignment or at least one preset second target alignment different from the first target alignment depending on the determined form of the feature of said valuable document.
