Abstract (en)

[origin: WO2012110557A1] The invention relates to a device (10) for handling value documents, comprising an input unit (20) for inputting at least one value document and a transport unit (24, 26, 248, 302, 304) for transporting the value document in a direction of transport (P1) along a transport path (218). A control unit (28) determines the nature of the value document using an image recorded by means of an image capturing unit (306) and depicting the input value document, and controls, depending on the determined nature of the value document, at least one processing unit (400, 600) arranged downstream of the image capturing unit (306) to process the value document.
