Abstract (en)

[origin: CA2826654A1] The invention relates to a high voltage switching device (1) having a charge storage assembly (3) comprising a multiplicity of charge storage modules (M1, M2, M3, M4,..., MN) connected in series, wherein in each case a specific number of the charge storage modules (M1, M2, M3, M4,..., MN) are arranged in a common subassembly housing (21, 30, 50), forming a charge storage module subassembly (B), and wherein the subassembly housings (21, 30, 50) are held in an insulated manner in a supporting framework.
