Abstract (en)

[origin: EP2676576A1] A furniture structure to hold beverage containers comprises a furniture body (1), a beverage container holding rack (2) and a fastening element (3) to fasten the beverage container holding rack (2) to the furniture body (1). The beverage container holding rack (2) includes a base (21), a retaining body (22) and a carrying body (23) hinged on the base (21) and retaining body (22). The carrying body (23) includes a carrying plane (232) exposed upon flipping against the base (21). The retaining body (22) includes a confining plane (221) exposed upon flipping against the carrying body (23). The base (21), carrying plane (232) and confining plane (221) jointly form a housing space (5) to hold a beverage container (4). Thereby the problem of the conventional beverage container holding rack mounted onto the furniture body (1) can be solved.
