Abstract (en)

An adjustable mounting mechanism is for mounting an elongate member 12 adjacent to a wall 14. A first adjustment arrangement 16 can move the elongate member 12 in a first direction 20 relative to the wall 14. A second adjustment arrangement 18 can move the elongate member 12 in a second direction 22 relative to the wall 14. The first arrangement 16 includes a rack 25 and a pinion 26 to move the elongate 12 across the face of the wall 14. The second arrangement 18 includes an externally threaded member 28 and an internally threaded member 30 which can move the elongate member 12 perpendicular to the wall 14.
