Abstract (en)
[origin: EP2676745A1] The assembly (1) has a drive shaft (2) whose outer end is centered on and rotatable about axis. A torque coupling is formed by shaft splines formed on shaft and tool splines formed on a tool (3) fittable with end of shaft. A radial-force coupling is formed by inner cylindrical shaft surface formed on shaft axially offset from shaft splines and centered on axis and a respective inner cylindrical tool surface formed on tool offset from tool splines, centered on axis, and radially juxtaposed and engageable with inner shaft surface.
