Abstract (en)

[origin: EP2676893A1] The container (1) has a pallet (5) and a belt (3) formed of multiple panels (7) defining a loading volume. The belt is vertically supported on the pallet by its lower edge (9), and fixed to the pallet by a locking element (15), where the locking element is secured to one panel of the belt, and cooperates with an edge of the pallet to secure the belt on the pallet. The belt includes a movable manual gripping element e.g. bar, to cooperate with the locking element so that the belt is released from the pallet by the gripping element.
