Abstract (en)

A take-up winder in which guide rollers are actively driven while the guide rollers are easily movable at the time of operations such as yarn threading is provided. The take-up winder includes a guide rollers 13 guiding yarns Y spun out from a spinning device to bobbins, respectively, and motors 24 driving the respective guide rollers 13. The guide rollers 13 are connected with the motors 24 by magnet couplings 30, respectively, and are movable independently of the motors 24.
