Abstract (en)  
[origin: EP2677099A2] The safety cabinet has a cabinet body (1) rotatably connected to a swing door (2), where the free handling swing door is formed with an internal pressure latch (7,8). The pressure latch is formed in open and closed manner by pressure application of the swing door. The pressure latch is formed in two parts, where the swing door is connected to a sealing stud, while the cabinet body is attached to a pin adapter. The sealing stud is equipped with a drop lever.
