Abstract (en)
[origin: EP2677242A1] The device (1) has a housing (2) that comprises an air intake unit (20) with a slot-like inlet opening (30) near a free end portion (21). An upper outlet opening (31) is provided for discharging the intake air. A fan device (50) is provided to intake the air through the inlet opening and to make an air flow (L) into an air supply duct (61). A lower outlet opening (32) is formed in the center or near a side wall (3) provided opposite the free end portion. The lower outlet opening is provided to pass an outgoing fluid current (L2) through the inlet opening of the intake unit.
