Abstract (en)

[origin: EP2677608A1] A release device (100) for detaching a male plug of a cable line from a female receptacle includes a holding portion (110), an accommodating portion (120), a connecting portion (130) and an engaging portion (140). The accommodating portion includes a first guiding part (121) that is configured for alignment between the accommodating portion and the male plug. The holding portion (110) connects to the connecting portion (130) that connects to the accommodating portion (120). The accommodating portion connects to the engaging portion (140), which includes a concave area (141) that is configured for engaging the male plug.
