Abstract (en)
[origin: WO2012114034A1] The invention relates to a fluid product distributor comprising: a fluid product reservoir (1) defining a neck (11) and a bottom (12) provided with a filler valve (13, 15); a distribution member (5) such as a pump that is mounted on the reservoir (1) in order to remove some of the fluid product, and comprises a body (51) and an actuating rod (56) that can be moved back and forth along an axis X; a tappet (6, 7) mounted on the actuating rod (56) of the distribution member (5) in such a way as to rotate on itself about the axis X of the rod (5, 6); a venting passage connecting the reservoir (1) to the outside; closing means (3) for selectively closing the venting passage; and control means (4) for switching the closing means (3) from an open state wherein they do not close the venting passage to a closing state wherein they close the venting passage. The invention is characterised in that the control means (4) are secured to the tappet (6, 7) or movably driven by the tappet.
