Abstract (en)

[origin: WO2012113710A1] The invention relates to a wiper blade (10) and to a method for producing a wiper blade (10) for wiping panes, in particular motor vehicle panes, comprising a support element (12) for receiving a wiper strip (14), to which a connecting device (20) is attached, which has a wiper blade-side part (15) having claw-like receptacles (34, 36) surrounding the support element (12) at least in some regions. According to the invention, the connecting device comprises passages and/or openings which allow a weld connection or can receive melt flow.
