Abstract (en)

[origin: WO2012113614A1] A device and a method for packaging articles (14) are proposed, wherein the device comprises the following: at least one insertion device (30) which transfers articles (14) to be packaged into a folded box (28), at least one transport means (16) which transports a plurality of articles (14) to be packaged in the form of a stack in at least one packaging material bowl (12) into the gripping region of the insertion device (30), wherein an aligning unit (20) is provided which, in order to stabilize the stack, acts on the articles (14) which lies in the packaging material bowl (12), before said articles (14) pass into the gripping region of the insertion device (30).
