Abstract (en)

[origin: WO2012113088A1] The fastening bracket (1) is made of plastic and comprises a base limb (3) and a retaining limb (5). The base limb (3), having a lower cover plate (11) and an upper cover plate (13), comprises a framework, which is formed by brace pairs (17) and (19), which extend between the two cover plates (11, 13) in the manner of a roof. The base limb (3) extends under the retaining limb (5) to the outer surface (23) of the retaining limb. Nail loops (9) are arranged on the retaining limb (5) in such a way that the flow of the liquid concrete is promoted between the formwork and the fastening bracket (1).
