Abstract (en)
[origin: WO2012113600A1] The invention relates to a heating body (1) comprising a vessel (2) which is lined at least on an outer side (3) with ceramic (4), marble, stone or glass, wherein at least one wall (7) of the vessel (2) is formed as a heat exchanger (9) which can be connected to a circuit (17) of a heat carrier material. The vessel (2) defines an interior (11) which is filled with a phase change material (12), wherein the heat exchanger (9) projects into or extends through the phase change material (12).
