Abstract (en)  
[origin: WO2012113991A1] The present invention relates to a control device (1) used in controlling operations of forest machines in particular. Such a control device comprises an outer surface (2) which is oriented towards an operator's hand and which has a mating surface (7) settling against the hand, as well as a set of different controls (4, 5, 6). The invention is characterized in that the outer surface (2) of the control device (1) is provided with at least one support device (8). Such a support device forms the mating surface (7) receiving the palm of the operator's hand using the control device. The support device comprises an edge portion, a part thereof being provided with a hand edge support (9) which extends therefrom with respect to the outer surface of the control device.
