Abstract (en)
[origin: WO2012131189A1] The invention relates to an alarm triggering device (200) for a security system (10), said alarm triggering device (200) comprising an interface (210) arranged so as to connect the alarm triggering device (200) to a device for managing the security system (100) by means of a wireless connection (50); triggering means (220) for triggering an alarm in the case of a pre-determined event; means for controlling the wireless connection (240) in order to check, during an alarm triggering device installation step, the quality of the wireless connection between said alarm triggering device and the management device; and signalling means (250) for signaling, to the alarm triggering device, an indication of the quality of the wireless connection between said alarm triggering device and the management device during the alarm triggering device installation step.
